DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-6 and 13-24, drawn to a method and apparatus for establishing a Bluetooth wireless connection between portable computers comprising establishing a Bluetooth connection without need of a Bluetooth inquiry message, wherein the establishing bypasses standard Bluetooth discovery processes, classified in class 455, subclass 41.2.
 - II. Claims 25-30, drawn to a method of rejecting a Bluetooth communication request comprising rejecting the Bluetooth communication request if the device ID is not a member of a list of trusted device identifications, classified in class 455, subclass 519.
2. The inventions are distinct, each from the other because of the following reasons:
3. Inventions [I] and [II] are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention [I] has separate utility such as establishing a Bluetooth connection without need of a Bluetooth inquiry message,

wherein the establishing bypasses standard Bluetooth discovery processes. See MPEP § 806.05(d).

4. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.
5. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
6. Applicant is advised that the response to this requirement to be complete must include an election of the invention to be examined even through the requirement be traversed.
